

The Standards Institute is an immersive and transformative **five-day in-person learning experience.**

All teachers, coaches, and leaders interested in enhancing instructional practices still focused on standards and shifts, while learning how to incorporate **GLEAM™ (grade-level, engaging, affirming and meaningful)** instruction in classrooms, schools, districts, and states are welcome to attend!

This experience is not a conference where you go in and out of different sessions. Participants will engage in an immersive learning experience along grade bands and content-focused pathways.

- Go deep into UnboundEd's intersection of standards, content, instruction, and equity
- Understand the value of teaching grade-level standards to ALL students using GLEAM™ instruction
- Develop practical, day-to-day skills for improving equitable instruction
- Participate in intentional and strategic planning with your teams
- Address the roles that race, bias, and prejudice play in schools
- Be transformed by current thought leaders on issues surrounding equitable instruction
- Form strategic relationships with like-minded educators
- Learn with a group of 30-40 educators led by two of our highly trained facilitators
- AM & PM snacks, daily lunch, and access to evening events

**Anaheim, CA**  
**February 6-10, 2023**

## About the Pathways

There will be opportunities to learn with educators along grade bands and content-focused pathways.

### ELA Pathway K-5, 6-8, 9-12

Participants learn and practice crafting supports and scaffolds that help address students' unfinished ELA instruction while maintaining the rigor and demands of the standards and curriculum. Participants explore the commitment, knowledge, and skills necessary to use ELA standards, texts, and tasks to provide all students access to GLEAM™ instruction. They leave with a personal action plan for bringing GLEAM™ instruction to life in their ELA classrooms.

### Leadership Pathway K-5, 6-8, 9-12

Participants learn key concepts of ELA and math instruction in order to develop a deeper understanding of each subject area. Participants will consider key components of planning, instructional delivery, and coaching that lead to GLEAM™ instruction. They also unpack their roles as leaders in educational equity and leave Standards Institute with a personal action plan to lead GLEAM™ instruction to life in their schools.

### Math Pathway K-5, 6-8, 9-12

Participants learn through an interactive, hands-on experience that focuses on planning and implementing GLEAM™ mathematics instruction. Participants reflect on math identity and its impact on GLEAM™ math instruction. They deepen their understanding of the Mathematical Shifts to support GLEAM™ math instruction. Participants also learn a new approach to address students' unfinished instruction that supports GLEAM™ math instruction within their school contexts. Participants leave Standards Institute with a personal action plan for bringing GLEAM™ instruction to life in their math classrooms.

### Science Pathway 6-8

Participants learn and practice the principles and key practices of science instruction that embodies the Next Generation Science Standards and a vision of GLEAM™ instruction for all students. These hands-on sessions involve a balance of exploring new ideas and seeing how they work through lessons and investigations across scientific domains. Participants leave Standards Institute with a repertoire of practical strategies and a personal action plan for bringing GLEAM™ instruction to life in their science classrooms.

### UnboundEd Planning Process™ (UPP) K-5 and 6-12

Participants learn a set of powerful practices for bringing each aspect of GLEAM™ instruction to life in ELA and math classrooms. For each practice, participants explore what it is, learn a step-by-step recipe for using the strategy with any lesson, and apply it to a set of high-quality lessons. They leave with a repertoire of well-rehearsed strategies they can implement on Monday morning and a personal action plan for bringing GLEAM™ instruction to life in their classrooms.
